Problem

Tired of Windows crashing? Sick of having software lock up or taking forever to load? The problem could be all of those incorrect registry entries caused by software installation and un-installations that went awry.

As you use Windows, over time the registry becomes unnecessarily bloated and often times corrupted, all because various programs fail to update and/or delete unneeded settings. This leads to longer startup times, slower performance and eventual failure of different hardware components, software or the Windows operating system.

Solution

Registry Repair Pro

Safely clean and repair your Windows Registry

Registry Repair Pro scans the Windows Registry for invalid or obsolete information in the registry. When you fix this information it will make your PC run faster and will make your PC error free. By using a registry cleaner regularly and fixing your registry, your computer will become more stable and help Windows and your software run faster.

Used routinely, **Registry Repair Pro** will allow you to optimize the registry and maintain it in perfect condition - all with the click of a button! Through every step of the process, you remain completely in charge - **Registry Repair Pro** will never make a single modification to your registry without your permission! The program is so flexible; it even creates dated backup copies of the registry, which allows you to restore to an earlier version if needed.

Features

- Increase system speed and stability by removing orphaned references
- Scans your hard drive for invalid and incorrect program shortcuts
- Safely make backups of any registry change made by Registry Repair Pro

- Works with Windows XP, ME, 98, NT and 2000
- Easy to Use Graphical Interface

Full Review

It is likely that you have downloaded some programs in the past that you no longer use or you have uninstalled that left parts of programs on your system.

Every time a new hardware component or software is installed, the registry is typically updated to reflect this. In addition, many programs use the registry to store configuration information about the program or a user's preferences.

Unfortunately, over time, the registry can grow to enormous proportions, especially if the various programs you've installed do not do a good job of deleting and/or updating it's Registry entries.

Summary

Registry Repair Pro uses a proprietary detection algorithm to quickly identify missing and invalid references in your Windows Registry. These problems can occur for many reasons including being left-behind after the un-installation or incorrect removal of software, by missing or corrupt hardware drivers, or orphaned startup programs.

- **Scan and correct invalid information in registry**
- **Increases system performance and stability**
- **Safe and easy way to clean Windows Registry**
- **Easy to use 'Wizard' type Graphical Interface**

Ease of Use

Registry Repair Pro is perfect for both Novice and Advanced Users.

Novice Users -Just click "Scan the registry for errors" then click the next button. Registry Repair Pro will find all of the invalid and obsolete information that is bloating the Windows Registry causing your system performance to slow down.

Registry Repair Pro is an extremely useful and easy to use tool. Just follow these 4 simple steps:

1. Scan registry for invalid or bad entries.
2. Select fix for your invalid registry entries.
3. Save a backup file of your registry.
4. Fix the registry.

Advanced Users - Registry Repair Pro allows users to scan their registry for custom values.

With a simple click of the mouse, Registry Repair Pro, searches for invalid registry entries you can do without. Through every step of the process, you remain completely in charge - Registry Repair Pro will never delete a file without your permission! Registry Repair Pro is so flexible, it even allows you to specify custom registry entries to locate and erase!

Screen Shots

Registry Repair Pro includes an easy to use graphical interface that lets you start cleaning your registry with a simple click of the mouse. See the picture below to view Registry Repair Pro's crisp interface.
