Subject: New software submission:10/17/2007 8:55:24 PM

A visitor has submitted information about a new software threat or one that is not caught properly by CounterSpy.

Contact Name: [Jane ...]

Contact Email: [removed]

Software was found here: Win AntiVirus Pro pop up

Brief Description:

You predatory idiots have this pirate program that has infected my computer. Can't get rid of it without paying some licentious amount.

The fucking thing has interfered with my ability to use most search engine functions, then you can't make the fucker go away. You

cocksucker should all be shot, left bleeding and forced to watch your computer screwed up by some mercenary pricks like yourselves. I

wouldn't but your fuck product at gun point.

Call for governmental regulation of the internet to protect consumers from shitheels like you. Assholes.
